

How to Log On

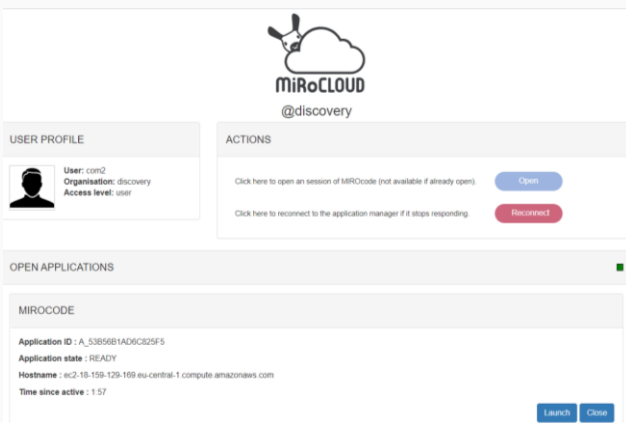

Step 1: Go to <http://www.cqrhub.com/>

Step 2: Type the Username and Password given in the email

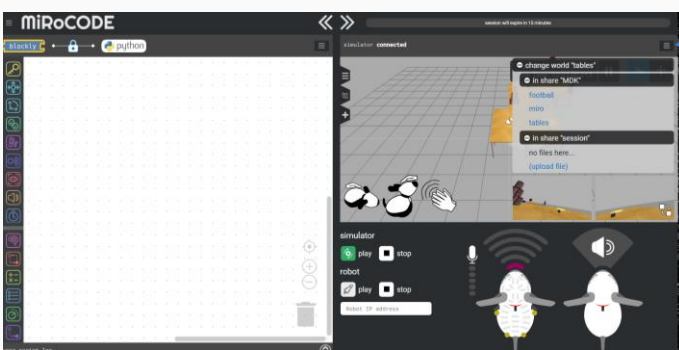

Step 3: Click open and wait for the launch button to appear

Step 4: Click launch

Step 5: Use the three lines to change the arena

Use these three lines to change MiRo's arena

These three lines let you save your code or load an old one

This is how you switch between python and blocks

Fun Tip!
You can zoom into MiRo by putting two fingers on the touch pad and moving them forwards and backwards

If you want to move MiRo or any of the objects inside, click this and move the object with the arrows

MIROCODE

Coding Blocks

This is where you put the blocks

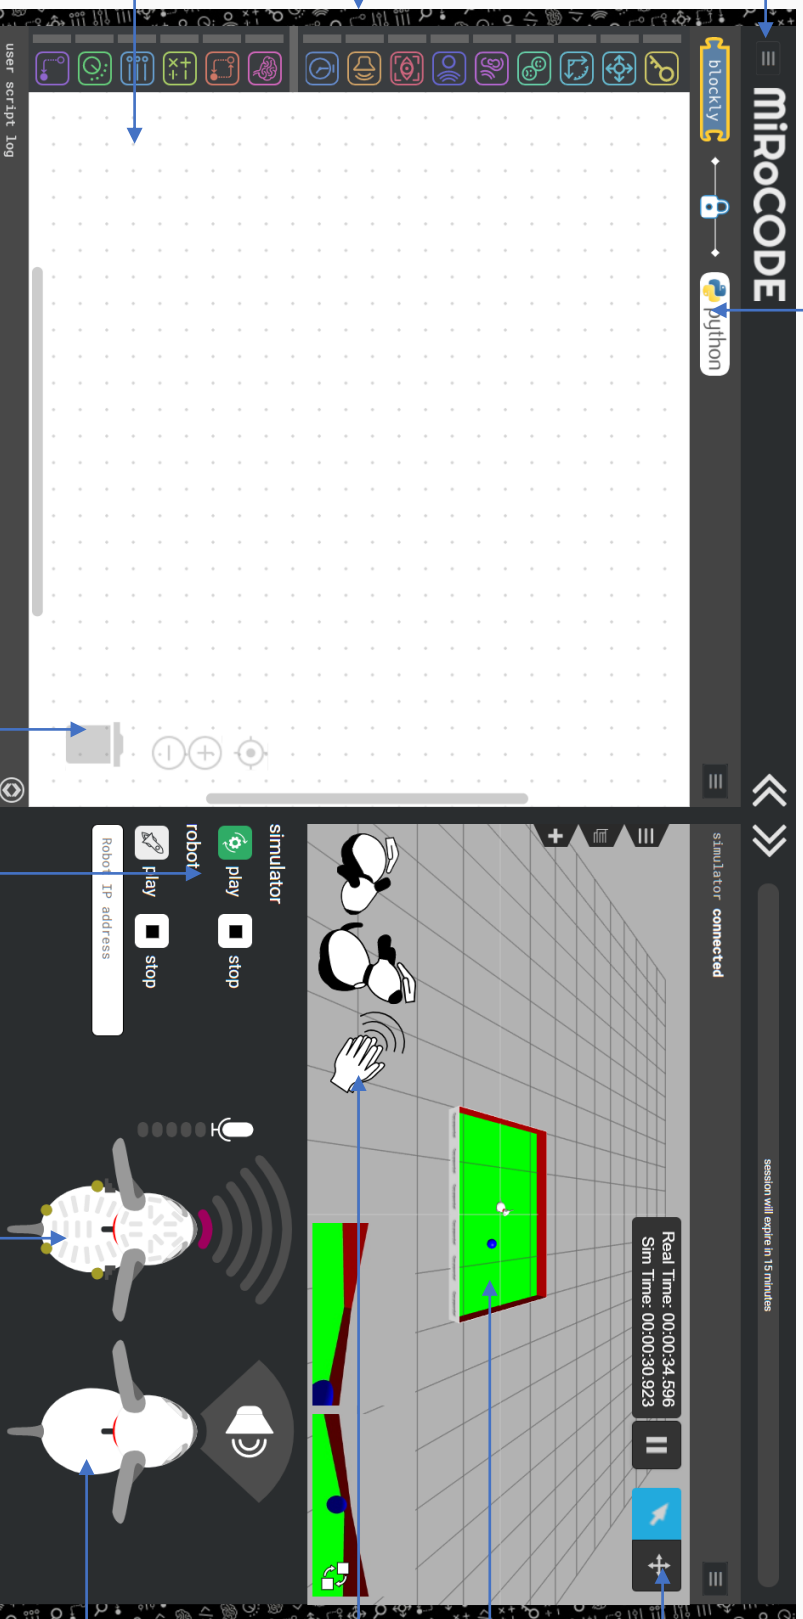

blocks

The bin for any blocks you don't want

Play the code on the simulator

MiRo's sensors

MiRo's lights

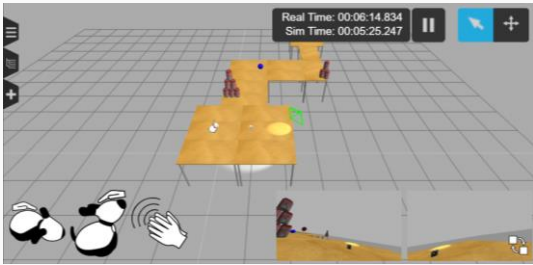

MiRo in the arena

Simulate a clap, body touch or head touch

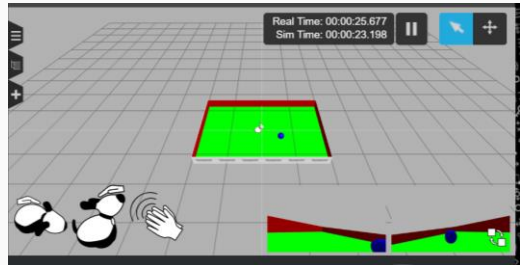

What are Arenas?

These are the different areas that simulation MiRo can move in.

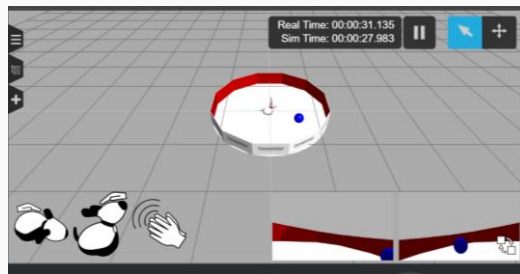

Tables

Football

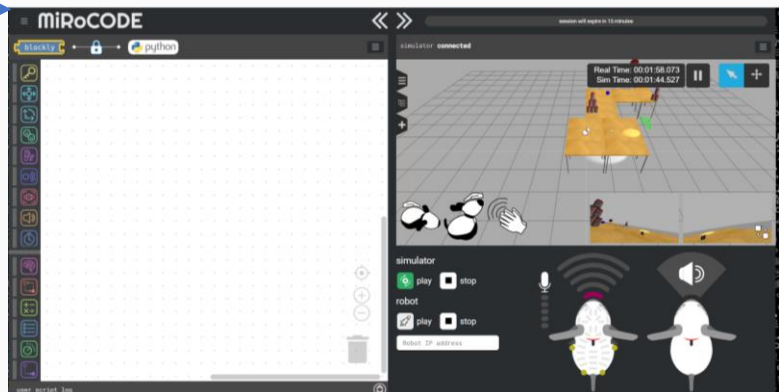

MiRo

Saving and Loading Code

Click these three lines to save, load or clear your code

Save your current code

Load your old code

Clear your current code
